### ABOUT ME

I am an architect and 3D artist with three years of experience in Blender and Unreal Engine. I combine the experience and knowledge I've gained as a 3D artist with architectural visualization to create more realistic and impactful scenes. I strive to reflect my expertise in lighting, materials, and composition in the environments and designs I create.

With my experience in Unreal Engine for virtual tour design, I make architectural projects more accessible and understandable. Additionally, I use Corona and V-Ray to produce photorealistic renders, capturing the atmosphere of spaces accurately.

I enjoy combining technology and architectural knowledge, and I place great importance on continuously learning new things and developing myself in both fields.

### EDUCATION

#### Ozyegin University

Architecture

2018 - 2024

### SKILLS

- Blender
- Unreal Engine
- Adobe Photoshop
- Adobe Illustrator
- Adobe AfterEffects
- AutoCad 2D -3D
- Revit
